Observables

Observable

Method of
Interest:
subscribe( )

Observable Base

Method of
Interest:
_subscribe( )
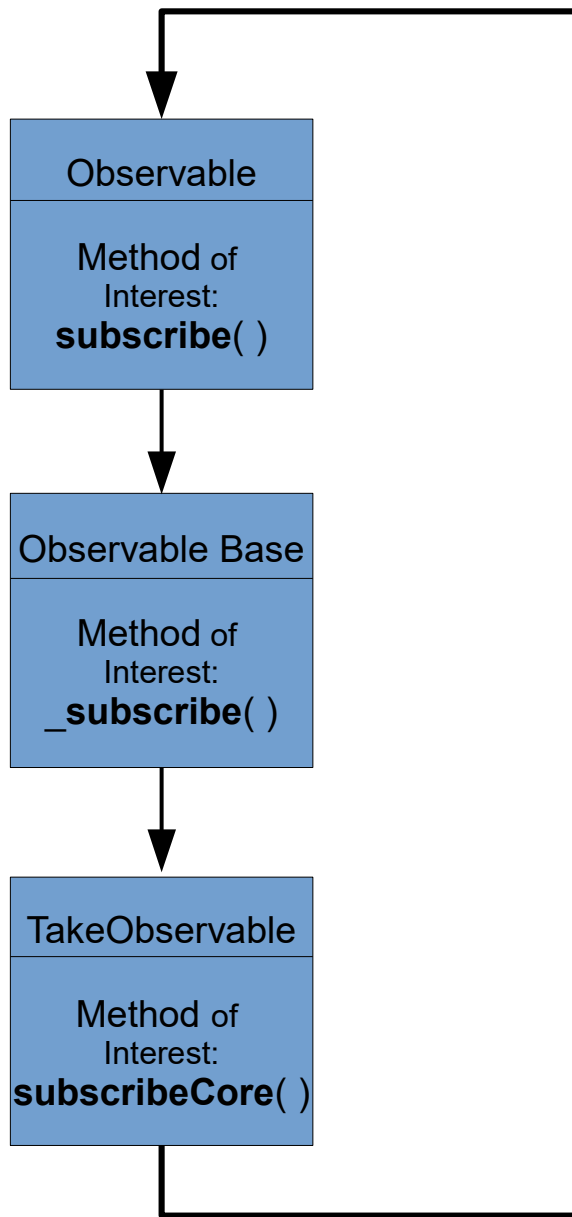

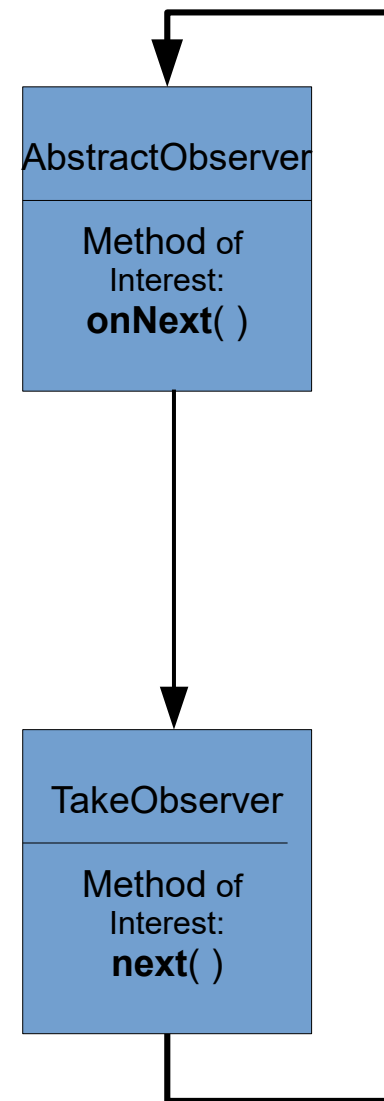

TakeObservable

Method of
Interest:
subscribeCore( )

subscribeCore( ) function of the TakeObservable,
calls the subscribe of its source and designates a
TakeObserver to receive values from the source.

Observers

AbstractObserver

Method of
Interest:
onNext( )

TakeObserver

Method of
Interest:
next( )

The next( ) function from TakeObserver
invokes the onNext( ) function of the observer
it has been updated with during its creation
thereby invoking the onNext( ) of the common
parent which is the onNext( ) function in
AbstractObserver.
